Alexander Reinthal

Senior Data Platform Engineer, Independent Contributor & Nix Advocate with expertise in building excellent reproducible environments from development to production. My Mission is to help build a safer future for AI. Passionate about developer experience, mentoring engineers and Nix.

Experience

Knowit Solutions Cocreate, Data Platform Engineer / Tech Lead / Delivery Manager

Gothenburg, Sweden
Feb 2022 – present

- Compared multiple LLM observability tools for use with a job-ad-to-consultant matching LLM platform. (LangChain, Langfuse, Arize Phoenix).
- Deployed Arize Phoenix (Similar to Langfuse) to monitor LLM calls and model performance.
- Lead initiative of migrating current development environments from Makefiles & VM deployment to Nix & Kubernetes (FluxCD, SOPS, GitOps, Nix devenvs, CI/CD pipelines, Terraform)
- Worked remotely leading development of a data platform for Databricks & Delta Live Tables using Nix development environments, CI/CD pipelines, GitOps & Terraform.
- Served as the technical lead, engaging with a client to design and implement a modern data platform using Python, poetry, Nix, Terraform, Custom Wireguard VPN gateway, CI/CD pipelines and GitOps for Data.

NTT Security, Security Analyst

Gothenburg, Sweden
Apr 2019 – Jan 2022

- Developed predictive analytics tooling for detecting malicious network traffic, leveraging Python, machine learning, and distributed processing.
- Automated security alert processing, optimizing real-time event analysis and reducing response times.
- Designed Python-based data ingestion and processing workflows, akin to real-time ETL pipelines in modern data engineering.
- Provided mentorship and security training, educating analysts on threat intelligence, anomaly detection, and alert triage automation.

Ericsson, Python Software Engineer

Gothenburg, Sweden
June 2017 – Oct 2018

- Led a team to develop a log parsing and analytics tool that scaled into a dedicated engineering team at Ericsson.
- Automated data workflow optimizations in Python, improving efficiency in log-based machine-generated data.

Projects

NixosConfig

[GitHub](#) 

- NixOS configuration for my personal laptop, workstations and production servers.

Datalake Stack

[GitHub](#) 

- Kubernetes cluster for a data lakehouse leveraging Apache Iceberg. Secondary use is to test LLM observability tools before putting them into production. Configs built using FluxCD.

- Inspired work to scale our open source data platform to multiple customers.
- Designed and implemented an on-premise data lake solution for Kubernetes using Dagster, Nessie, Apache Iceberg, MinIO, Apache Flink and Spark.

HowIgotPwned

[GitHub](#)

- Developed a modern data lakehouse solution leveraging Apache Iceberg, Flink, Spark, Nessie and Dagster to analyze high-volume data.
- Prototyped real-time ingestion pipelines using Apache Flink and Iceberg tables stored on Minio.

Open Source Contributions

[GitHub](#)

- Dagster Contribution: [PR #24188](#) – Improved workflow orchestration, scheduling, and monitoring of data pipelines.
- DLT Hub Contribution: [PR #594](#) – Mentored junior engineers, contributing Python data ingestion enhancements.

Technologies

Infrastructure & DevOps: Nix, uv, Docker, Podman, SOPS, FluxCD (Similar to ArgoCD), Git, Github Actions, CI/CD pipelines, Terraform, Ansible, Helm

Monitoring & Observability: Langfuse, Arize Phoenix, Splunk, Prometheus, Grafana, Loki, Elasticsearch, Kibana, Graylog

Languages: Python, SQL, Terraform, Nix, Go, Rust, C/C++, Assembly, Java, R

Data Engineering Tools & Platforms: Spark, Flink, Iceberg, Nessie, Databricks & Delta Live Tables, Snowflake, dbt, dlthub, Dagster

Business Intelligence Tools: PowerBI, Apache Superset, Evidence, Lightdash, Streamlit

Education

MS	Chalmers Technical University , Engineering Physics	Sept 2016 – June 2018
	• Coursework: Statistical Physics, Neural Networks and Machine Learning	
BS	Göteborg University , Computer Science	Sept 2013 – June 2016
	• Coursework: Algorithms, Testing, Debugging and Verification, Theoretical Computer Science, Operating Systems, Cryptography, Cyber Security	

Publications

Data Modelling for Predicting Exploits

Nov 2018

Reinthal, A, Filippakis, E., Almgren, M.
