7 years of industry experience - cybersecurity operations - machine learning - data science & engineering

Publications

Detecting Piecewise Cyber Espionage in Model APIs Nov 2025

Arthur Colle, Alexander Reinthal, David Williams-King, Yingquan Li, Lihn Le
apartresearch.com/project/detecting-piecewise-cyber-espionage-in-model-apis-a8gx

Data Modelling for Predicting Exploits Nov 2018

Reinthal, A, Filippakis, E., Almgren, M.
[10.1007/978-3-030-03638-6_21](https://doi.org/10.1007/978-3-030-03638-6_21) (Springer LNCS: Nordic Conference on Secure IT Systems)

Education

Chalmers Technical University

MS in Engineering Physics

*Gothenburg, Sweden
Sept 2016 – June 2018*

- Coursework: Statistical Physics, Neural Networks and Machine Learning

Gothenburg University

BS in Computer Science

*Gothenburg, Sweden
Sept 2013 – June 2016*

- Coursework: Algorithms, Testing, Debugging and Verification, Theoretical Computer Science, Operating Systems, Cryptography, Cyber Security

Experience

Fellow Participant

Jan 2026 – Feb 2026

ARENA 7.0

- ARENA prepares fellows for work as researchers in technical AI Safety.
- The curriculum is taught over four high-paced weeks and covers
- the transformer architecture, mechanistic interpretability, RLHF
- evals, working with the Inspect framework and much more.

Data Platform Engineer / Tech Lead / Data Scientist

Gothenburg, Sweden

Knowit Solutions Cocreate

Feb 2022 – present

- Mentored junior engineers
- Compared multiple LLM observability tools for use with a job-ad-to-consultant matching LLM platform. (LangChain, Langfuse, Arize Phoenix).
- Deployed Arize Phoenix to monitor LLM calls and model performance in production environments.

Security Analyst

Gothenburg, Sweden

NTT Security

Apr 2019 – Jan 2022

- Developed predictive analytics tooling for detecting malicious network traffic, leveraging Python, machine learning, and distributed processing.
- Provided mentorship and security training, educating analysts on threat intelligence, anomaly detection, and alert triage automation.

Python Software Engineer

Gothenburg, Sweden

Ericsson

June 2017 – Oct 2018

- Led a team to develop a log parsing and analytics tool that scaled into a dedicated engineering team at Ericsson.

Research Projects

Data Modeling for Predicting Exploits

2017 – 2018

Machine learning research project for predicting software exploits, resulting in peer-reviewed publication

- Developed experimental methodology for feature engineering and model validation in cybersecurity domain
- Discovered subtle ways that experiments can be compromised, ensuring robust evaluation protocols
- Published peer-reviewed findings in Springer LNCS (: 10.1007/978-3-030-03638-6_21)

Malicious Domain Prediction System

2021 – present

Real-time ML prediction application for assessing malicious domains

- Implemented real-time inference pipeline with performance monitoring

Certificates

- Bluedot AGI Strategy, Completed: 2025-10-07

Technical Projects

Data Breach Analysis Pipeline

2024 – present

Modern data lakehouse solution for analyzing large-scale password breach data

- Developed scalable data processing pipeline using Apache Iceberg, Flink, and Spark to analyze high-volume breach data
- Passion project to test new technologies that required big data

Open Source Contributions

Contributions to data engineering open source projects

- Dagster Contribution: [PR #24188](#) – Enhanced workflow orchestration for ML pipeline monitoring
- DLT Hub Contribution: [PR #594](#) – Improved data ingestion reliability for ML applications

Skills

Machine Learning & AI: PyTorch, XGBoost, SciKit Learn, Jupyter, LLM Observability (LangChain, Langfuse, Arize Phoenix)

Programming Languages: Python, Javascript, SQL, Rust, C/C++, R, Nix, Terraform

Research & Data Analysis: Experimental Design, Statistical Analysis, Distributed Processing, Real-time Analytics, Anomaly Detection

Infrastructure & DevOps: Nix, Docker, Kubernetes, FluxCD, GitOps, CI/CD pipelines, Terraform, AWS (EC2, S3, IAM)

Data Engineering & Platforms: Spark, Flink, Iceberg, Databricks, Dagster, Snowflake, dbt, Apache Superset
