Alexander Reinthal

Senior Data Engineer, Independent contributor & Open-Source advocate with expertise in real-time data ingestion, data modeling, and orchestrating cloud-based data workloads. Strong background in Apache Flink, Databricks, Dagster, and Snowflake, with proven contributions to open-source tools like Dagster & DltHub. Passionate about developer experience, mentoring engineers in distributed systems and ML-driven analytics.

Experience

Knowit Solutions Cocreate, Data Engineer / Tech Lead / Delivery Manager

Gothenburg, Sweden
Feb 2022 – present

- Led an agile R&D team to build real-time data ingestion pipelines handling massive volumes of CI-pipeline logs using **Apache Flink (AWS Kinesis/Data Streams equivalent)** & Spark Structured Streaming.
- Designed scalable data pipelines on Databricks & Snowflake, equivalent to AWS Glue & Athena.
- Served as the technical lead, engaging with a client to design and implement a modern data platform leveraging Snowflake, Dagster, and dbt.
- Owned the development of an asset-centric data modeling approach for Databricks & Delta Live Tables, improving streaming data reliability & developer experience.
- Mentored junior engineers in Python, SQL, and data engineering best practices. Led workshops on modern data engineering best practices, and aligning technical solutions with business objectives.
- Collaborated with stakeholders to refine data requirements and upstream data contracts.

NTT Security, Security Analyst

Gothenburg, Sweden
Apr 2019 – Jan 2022

- Designed tooling for real-time predictive analytics of malicious network traffic, leveraging Python, machine learning & distributed architecture.
- Educated other analysts in understanding how to analyze the alert flow.

Ericsson, Python Software Engineer

Gothenburg, Sweden
June 2017 – Oct 2018

- Lead a team to implement a log parsing tool which resulted in Ericsson hiring a team of engineers to continue its development.

Projects

HowIgotPwned

- Developed a modern data lakehouse solution leveraging Apache Iceberg, Flink, Spark, Nessie and Minio (AWS S3), and Dagster to analyze large-scale data efficiently
- Prototyped high-volume data ingestion with real-time processing from network interfaces using Apache Flink and AWS S3 Backed Iceberg tables.

github.com/reinthal/howigotpwned 

Datalake Stack

- An on prem datalake stack in kubernetes using Nessie, Apache Iceberg, Minio S3, Apache Flink & Apache Spark, (Amazon S3, Glue, ECS, EMR Equivalents).
- FluxCD configurations for a modern data stack using langfuse for LLM telemetry, Elastic Search, OpenWebUI for a chatbot, Rancher and Traefik for ingress.

github.com/reinthal/datalake-stack 

- Tools Used: Fluxcd, Kubectl, k9s

Open Source Contributions

github.com/reinthal

- github.com/dagster-io/dagster: Engaged with and contributed to Dagster open-source project, focusing on workflow orchestration, scheduling, and monitoring of data pipelines
- github.com/dlthub/verified-sources: Engaged with and encouraged junior developer to upstream changes to dlthub, a light-weight python data ingestion tool.

Technologies

Data Architectures: Data Modeling, Data Warehousing, Data Lakehouse Solutions

Semantic Layers: DBT Cloud, Cube.dev

Big Data & Streaming: Apache Flink, Apache Spark (EMR equivalent), rabbit-mq

Data Engineering Tools: Apache Flink, Apache Spark, Databricks & Delta Live Tables, Snowflake, DBT, Dagster, Airflow

Languages: python, sql, java, terraform, nix, rust, c++, assembly, R

Cloud & Platforms: Minio (AWS S3 Equivalent), , Azure, Kubernetes, Proxmox

Infrastructure & DevOps: Docker, Podman, FluxCD, Git, CI/CD pipelines

Business Intelligence Tools: PowerBI, Apache Superset, Lightdash

Education

MS	Chalmers Technical University , Engineering Physics	Sept 2016 – June 2018
	• Coursework: Statistical Physics, Neural Networks & Machine Learning	
BS	Göteborg University , Computer Science	Sept 2013 – June 2016
	• Coursework: Algorithms, Testing, Debugging & Verification, Theoretical Computer Science, Operating Systems, Cryptography, Cyber Security	

Publications

Data Modelling for Predicting Exploits

Nov 2018
